Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Drawings*

1. The drawings filed 11/17/2003 are accepted by the examiner

### *Claim Rejections - 35 USC §§ 102 & 103*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. Patent No. 3,964,134 to Ross ("Ross").

Ross discloses in Figures 1-4 the invention substantially as described in applicant's claim 1-20. In particular, Ross discloses a valve for a blowtorch, the valve having a housing connected between a nozzle (F) and a fitting (22). Fitting (22) functions to attach to a source of gaseous fuel, and though now shown, a fuel reservoir would be inherent in the disclosure of Ross. Ross also discloses a switching device (I) for switching the valve (D) between a communicating mode

Art Unit: 3749

and a blocking mode and an adjusting device (C) for adjusting the flow rate of gas through the valve. The housing includes the first and second chamber structure recited (see Fig. 1 and Fig. 2). The first chamber of valve (D) includes plunger, shoulder, driver and sealing structure recited that is considered equivalent to that recited in applicant's claims (see col. 3, lines 67 thorough col. 4, line 36). Adjusting device (C) also includes a plunger in a second chamber (see Fig. 1).

### *Conclusion*

5. This action is made non-final. A THREE month shortened statutory period for reply has been set. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) months from the mailing date of this communication.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents to Eads, Farnham et al., Mims et al., Tsai and German Patent No. 1 621 866 are included to further show the state of the art concerning torch valve structure.

7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://portal.uspto.gov/external/portal/pair>. Any questions on access to the Private
